Manufacturers of Fine Clays and Machés

Apoxie® Paste is used around the world by sculptors, restorers, miniaturists, hobbyists, crafters, repairers, and students. It is used in museums, schools, motion picture studios, aquariums, theme parks and homes. It is a slightly translucent khaki color. Apoxie® Paste, is a self-hardening synthetic adhesive with unlimited uses!

Apoxie® Paste

ARTS • CRAFTS • SCHOOLS • MUSEUMS • TAXIDERMY • HOBBIES

Features and Benefits

- Apoxie® Paste is a self-hardening, 2-part product (A & B must be mixed)
- Semi-batter like consistency
- Self-leveling
- Khaki color, slightly translucent
- Waterproof, safe to use with potable water
- Electrically non-conductive
- 0% shrinkage
- Extremely adhesive, durable and strong
- Adheres to almost any clean surface including ceramic, fiberglass, foam, fabrics, metal, plastic, glass, stone, wood, & more!
- Non-hazardous, non-flammable, no solvents or fumes. Conforms to ASTM D4236.
- Working time is about 3 hours, cures hard overnight (24 hour full cure)
- Can be seamlessly feathered before set-up, or can be tapped or drilled, sanded, filed, painted, or otherwise finished to match the repaired item
- Freeze-thaw stable
- Easy clean-up with Aves® Safety Solvent or soap & water

INNOVATIVE BONDING & FILLING ADHESIVE

..... **Unlimited Uses!**

Many scenery & habitat applications. Also use for Arts & Crafts, Antique Restoration; Home, Toy & Doll Repairs; Glass Art, Model Making; Jewelry; and much more. Taxidermy: Use as an adhesive for jaw sets, tongues, skull caps, fish & fin repairs, bones/skulls, teeth, etc. Form alterations. Prevent drumming by pasting down ear liners & hides.

Apoxie® Paste permanently fills, bonds, seals & repairs most materials. This all-purpose paste is a 2-part medium that is safe and easy to use. It has a semi-fluid, batter-like consistency, that is stir-able, yet thick enough that it tends to stay put. It can be spread thick or thin with a tool or craft stick. When applied thin it is slightly translucent. Apoxie Paste® can be tinted with paints or colorants while mixing to match or create a desired color. Smooths easily with Aves® Safety Solvent. Working time is 1-3 hours; 24 hour full cure. It is waterproof, with 0% shrinkage/cracking, & gripping flexibility. It can be sanded, painted or otherwise finished after it cures. Apoxie® Paste has been proven effective on many plastics, ceramic, metals, wood, stone, foam, and more. Simple water clean-up or use Aves® Safety Solvent. Great to use for casting with flexible molds.

3 Convenient Sizes: 2 fl. oz., 8 fl. oz., 32 fl. oz.
